

Fourth ArkLaMiss Wildlife Management Symposium

Ducks: Surveys, Seasons, Movements, Habitat, and Management

Do you want to learn the real scoop about ducks?

This symposium will feature the foremost waterfowl experts who are recognized waterfowl biologists from universities and federal, state, and non-governmental conservation organizations.

Learn important information about the following topics:

- **How surveys are conducted**
- **How seasons are set**
- **Where and why ducks move**
- **What habitat ducks use**
- **What ducks eat and how to provide that**
- **How to manage bottomland hardwoods**
- **How to manage agriculture crops**
- **What assistance programs are available for landowners**

If you want to hear from the real experts with the real data, then this one-day symposium is for you.

**The Fourth ArkLaMiss Wildlife Management Symposium
February 3, 2007
at the Louisiana Tech University Student Center**
