Weekly Moodle Tip:

Moodle allows you to customize how your grades are displayed to students. Grades can be in letter, real (points/number), percentage, and/or a combination of styles, e.g., letter and percentage.

To Change Your Grade Display Type:

1. In your Gradebook, click on the “Choose an action” menu.
2. Under the Settings header, click on “Course”.
3. In the “Grade Item Settings” section, use the “Grade Display Type” menu to select your preference.
4. Now, click Save Changes.

Note: If you choose an option containing “letter”, be sure to go to the “Letter” settings and edit your grading scale. You can get to this by clicking on “Edit” under the “Letter” heading in the “Choose an action” menu.

For further assistance, please contact the CIT.
