Weekly Moodle Tip:

In Moodle, Gradebook items can be collapsed or expanded in the gradebook.

To collapse/expand items, you must be in the Grader Report view.

To collapse a category of items, click on the minus icon next to your category name. Now, the individual items will collapse and only the category total will show.

To expand a category/restore after collapsing, click the plus icon next to the category name. Now, all of the individual grade items for that category will show.

For additional help, please contact the CIT.
