Weekly Moodle Tip:

It is easy to “curve” a quiz, assignment, etc. that is automatically graded by Moodle. This can be easily set up in the gradebook enabling Moodle to automatically add the selected number of points to each student’s score.

To do this, select “Full View” from the “Choose an action” drop down menu in the gradebook.

Locate the “Offset” column across from the assignment, quiz, etc. that you would like to curve.

Enter the number of points that you would like Moodle to add to each student’s score in the corresponding box and click “Save changes”.

For additional help, please contact the CIT.
