Weekly Moodle Tip:

In Moodle, professors can turn off the course total in their gradebook preventing students from seeing it.

NOTE: DO NOT TURN OFF THE EYE in the Full View. This will hide ALL of the grades from your students.

To stop the display of the course total, click on the "Edit/Update" icon in the Grader Report next to the course name.

Next, change the "Grade Type" setting to "None". Save changes.

Some things to consider:

1. This can be done for each category as well. Just click the "Edit/Update" icon next to the category header.
2. This CANNOT be done when using the "Sum of Grades" aggregation method.
3. You will want to turn "Grade Type" back to "Value" before calculating your students’ final grades.

For additional help, please contact the CIT.
