REGISTRATION SCHEDULES (Spring 2012) – ENGINEERING

For students eligible for MATH 240

If you are eligible for MATH 240 you should register for schedule 1 or 2 shown below. If you are just now completing Math 100, you are required to enroll in Math 112, Trigonometry, before enrolling in Math 240. It is assumed that all students enrolling in Math 240 have successfully completed a very strong full semester trigonometry course in high school. Students who have not completed such a course, with a grade of A or B, will find it very difficult to be successful in the Math 240 sequence of courses. Even if you are completing Math 101, you should seriously consider taking Math 112 unless you had a strong trigonometry background in high school.

Note that the section number is important since these courses are integrated with each other. In other words, you can not mix and match classes from the schedules below.

***** Students in ENGR 120 are required to purchase a robotics kit and other supplies. *****

To get a list of supplies go to www.LivingWithTheLab.com and select *Student Purchases*.
