

Chapter 17 - Graduate Programs

College of Applied and Natural Sciences

Administration

Dean

James D. Liberatos

Associate Dean for Graduate Studies and Research

William J. Campbell

Associate Dean for Undergraduate Studies

Janet F. Pope

Department of Health Information Management

Angela Kennedy, Head

School of Biological Sciences

William J. Campbell, Interim Director

School of Human Ecology

Linda Sivils, Interim Director

Address

More information about the College of Applied and Natural Sciences can be obtained by writing to

College of Applied and Natural Sciences

Louisiana Tech University

P.O. Box 10197

Ruston, LA 71272

(318) 257-4287

and by visiting the College's web site at

<http://www.latech.edu/ans>.

Graduate Degrees Offered

Master of Health Information Management

Master of Science

- Biology (with concentrations in Cell and Molecular Biology, Environmental Biology, and Organismal Biology)
- Family and Consumer Sciences (with concentrations in Family and Consumer Sciences Education, Family and Child Development, and Consumer Studies).
- Nutrition and Dietetics (with concentrations in Clinical Dietetics and Community Dietetics)

Master of Science Molecular Sciences and Nanotechnology

Graduate Certificates Offered

Graduate Certificate in The Dynamics of Domestic Violence

Requirements for Admission

Students seeking admission to a graduate program in the College of Applied and Natural Sciences are required to have an earned bachelor's degree from an accredited college or university. Prospective students are also required to submit an official copy of their General Test scores from the Graduate Record Exam (GRE). Students admitted to a graduate program in the College of Applied and Natural Sciences may be awarded either unconditional or conditional admission status, based on the student's undergraduate grade point average (GPA) and GRE scores. In the Department of Health Information Management and the School of Biological Sciences, the minimum GPA required for unconditional admission status is 3.00. In the School of Human Ecology the minimum GPA required for unconditional admission status is 2.75. Students may qualify for conditional admission status for each of the College's programs with a minimum GPA of 2.50. Unconditional admission status requires the minimum GPA of 2.75, and a score of 1400, or higher, using the formula $(GPA \times 200) + (GRE\text{-verbal} + GRE\text{-quantitative}) = 1400$.

Conditional admission status requires the minimum GPA and a score of 1200, or higher, using the formula $(GPA \times 200) + (GRE\text{-verbal} + GRE\text{-quantitative}) = 1200$.

Students admitted to a graduate program will have their transcripts reviewed for previous course work completed. Students who lack necessary prerequisite course work may be required to satisfy deficiencies in the early stage of their graduate program.

Department of Health Information Management

The Department of Health Information Management (HIM) offers a non-thesis program leading to a professional Master of Health Information (MHIM) degree. The Program is offered in an online format; on-campus courses are not available.

Admission

Applicants to the MHIM program must meet the general admission requirements of the Graduate School and the College of Applied and Natural Sciences. Applicants possessing an undergraduate degree in a field other than HIM will require management/supervisory experience in the field of health information management or other allied health-related field so that conceptual material may be effectively applied to actual professional experience. These students will be required to complete two undergraduate prerequisite courses, usually offered in the Fall, before entering the program, HIM 490 (Foundations of Health Information Management I) and HIM 491 (Foundations of Health Information Management II).

Program of Study

Requirements for the Master of Health Information degree include a minimum of 39 semester hours of credit, including the following courses taken in year one: HIM 501, HIM 502, HIM 503, HIM 504, HIM 511, HIM 512, HIM 521, and PSYC 523. Courses taken in year two include HIM 513, HIM 522, HIM 523, PSYC 541, and PSYC 542.

Research Activities

Faculty members in the Department of Health Information Management are involved in areas of research that may serve as a foundation for student projects or independent studies. Students interested in pursuing research are encouraged to contact the appropriate graduate faculty member or the Head of the Department of Health Information Management. Information describing faculty research areas is available directly from the faculty or from the Department of Health Information Management.

Financial Support

Because of the online delivery of this program, graduate assistantships are not available. For additional information concerning financial support, contact the Head of the Department of Health Information Management.

School of Biological Sciences

The School of Biological Sciences offers both thesis and non-thesis programs of study leading to the Master of Science in

Biology with concentrations in Cell and Molecular Biology, Environmental Biology, and Organismal Biology.

Admission

Applicants to the Master of Science in Biology program must meet the general admission requirements of the Graduate School and the College of Applied and Natural Sciences.

Program of Study

Thesis Plan

The program of study for the degree of Master of Science in Biology with the thesis plan consists of a minimum of 30 semester hours of graduate credit of which at least 15 hours must be earned in 500-level, or above, courses. Required courses include BISC 502 (Research Methods in Biological Sciences), BISC 509 (Biological Sciences Seminar), BISC 535 (Current Topics in Biological Sciences), and 3 semester hours of statistics. A maximum of 6 semester hours of credit for BISC 530 (Biological Sciences Special Problems) combined with BISC 540 and BISC 541 (Biological Sciences Internship) can be applied toward the degree. Enrollment in 3 hours of graduate credit is required each quarter the student is using university resources (faculty time, laboratories, computing facilities, etc.) for thesis work. A maximum of 6 semester hours of BISC 551 is granted as partial fulfillment of the degree plan. Students will pursue original research in a specialized field of interest, supervised by a thesis advisor and approved by the student's Graduate Advisory Committee. Completion of the thesis plan includes an oral defense of the thesis and oral examination conducted by the student's Graduate Advisory Committee.

Non-Thesis Plan

The program of study for the degree of Master of Science in Biology with the non-thesis plan consists of a minimum of 36 semester hours of graduate credit of which at least 18 hours must be earned in 500-level, or above, courses. Required courses include BISC 502 (Research Methods in Biological Sciences), BISC 509 (Biological Sciences Seminar), BISC 517 (Applied Biological Sciences Research), BISC 535 (Current Topics in Biological Sciences), BISC 585 (Comprehensive Exam in Biological Sciences; 0 credit hours), and 3 semester hours of statistics. A maximum of 6 semester hours of credit for BISC 530 (Biological Sciences Special Problems) combined with BISC 540 and BISC 541 (Biological Sciences Internship) can be applied toward the degree. Non-thesis students are required to pass comprehensive written and oral examinations conducted by the student's Graduate Advisory Committee.

Master of Science in Molecular Sciences and Nanotechnology (MSMSNT)

The School of Biological Sciences and the College of Applied and Natural Sciences offer an interdisciplinary Master of Science degree in Molecular Sciences and Nanotechnology (MSNT) in collaboration with the College of Engineering and Science. Please see Chapter 16 of this catalog for more information.

Research Activities

Faculty members conduct a wide range of research that may serve as the basis for student theses or independent study projects. Students interested in pursuing research are encouraged to contact the appropriate graduate faculty member, the Director of the School of Biological Sciences, or the Associate Dean for Graduate Studies and Research. Information describing faculty research

areas is available directly from the faculty, from the School of Biological Sciences, or online at <http://www.ans.latech.edu>.

Financial Support

A limited number of University and externally funded assistantships are available on a competitive basis. Students holding assistantships will have out-of-state fees waived, if applicable. Students may also be employed as student workers. For additional information concerning financial support, contact the Director of the School of Biological Sciences.

School of Human Ecology

The School of Human Ecology offers both thesis and non-thesis programs of study leading to the Master of Science in Family and Consumer Sciences (with concentrations available in Family and Consumer Sciences Education, Family and Child Development, and Consumer Studies).

The School of Human Ecology also offers both thesis and non-thesis programs of study leading to the Master of Science in Nutrition and Dietetics. This degree is awarded only to individuals who have satisfied requirements to take the examination to become a registered dietitian.

Dietetic Internship

The Dietetic Internship is a four-quarter post-baccalaureate program allowing students to meet the American Dietetic Association performance requirements required to be eligible to take the registered dietitian examination. Graduates of an accredited or approved didactic program in dietetics (DPD) may apply for admission to the dietetic internship. The program is implemented through facilities in Shreveport, Ruston/Monroe, and Alexandria. Students are assigned to facilities in one city to minimize required travel.

Dietetic internship students enroll in Graduate School and earn undergraduate credit for the practica courses and graduate credit for content courses. Students are required to enroll in 6 hours of graduate credit during the summer, and 3 hours of graduate credit work during Fall, Winter, and Spring Quarters. Receipt of the Dietetic Internship verification statement does not require completion of the MS program, although students are encouraged to complete the degree program. Most graduate courses are offered on-line to facilitate completion of the degree after students finish the internship.

Accreditation

The School of Human Ecology is an official member of the American Association of Family and Consumer Sciences Higher Education Unit. The undergraduate programs are accredited by the Council for Accreditation of the American Association of Family and Consumer Sciences and approved by the American Dietetic Association. No accreditation program exists for MS programs.

The Dietetic Internship is accredited by the Commission on Accreditation for Dietetics Education of the American Dietetic Association (120 South Riverside Plaza, Suite 2000, Chicago, IL 60606-6995), a specialized accrediting body recognized by the Council for Higher Education Accreditation and the United States Department of Education.

Admission

Applicants to a graduate program in the School of Human Ecology must meet the general admission requirements of the Graduate School and the College of Applied and Natural Sciences. Applicants must have an earned bachelor's degree from an accredited college or university with a major in human ecology or

a related field. Students applying for admission into the post-baccalaureate dietetic internship must meet additional admission criteria. For more information contact

Dawn Erickson, Dietetic Internship Director
School of Human Ecology
PO Box 3167
Louisiana Tech University
Ruston, LA 71272

or visit the College web site at

<http://www.latech.edu/ans/human-ecology/index.shtml>

Program of Study

Requirements for a Master of Science degree in the School of Human Ecology include the following:

1. For the thesis plan, a total of 30 credit hours, including 6 hours of HEC 551 (Research and Thesis).
2. For the non-thesis plan, a total of 39 credit hours.
3. A grade point average of 3.0 on all graduate work pursued.
4. A minimum of one-half of required credit hours earned in 500-level or above courses.
5. Credit in HEC 504 (Methodology in Human Ecology Research), HEC 546 (Microcomputer Applications), a statistics course available for graduate credit, and completion of HEC 585 (comprehensive Exam in Human Ecology; 0 credit hours).
6. Completion of a thesis or a one-quarter research project.

Students will develop individualized plans of study, based on their selected areas of study and individual career goals, with the guidance of their Graduate Advisory Committee. Recommended course work is listed in the School of Human Ecology Graduate Student Handbook. Students should contact the School of Human Ecology to obtain a copy of the Handbook.

Research Activities

Faculty in the School of Human Ecology are involved in areas of research which may serve as a foundation for students' theses or independent studies. Faculty research in family and consumer sciences relates to young and older adults (e.g., close relationships, abstinence education for teenagers, intergenerational mentoring), children (e.g., child care availability, infant and toddler development, children's dietary intake and body images, preschool education methodology and teaching strategies, and developmentally appropriate practice), and shopping behaviors (e.g., the older shopper, behavior related to dress and image, and fashion cycles). Faculty research in Nutrition and Dietetics includes outcome-based research for the practice of dietetics and nutritional and dietary assessment (e.g., dietary fat intake, calcium intake, fruit and vegetable intake, dietary supplements, risk factors for cardiovascular and osteoporosis diseases), life cycle effects (e.g., maternal and child nutrition, and geriatric nutrition), food service management (e.g., environmental issues, financial, and employee productivity), and education (e.g., dietetic, and education factors that influence dietary intake).

Financial Support

A limited number of University and externally funded assistantships are available on a competitive basis. Students holding assistantships will have out-of-state fees waived, if applicable. Students may also be employed as student workers. The Merle Burke, Willie Fletcher, and Jeanne Mack Gilley scholarships are available for Human Ecology students. For additional information, contact the Director of the School of Human Ecology.
